Background: The Chinese hospital ranking list collated by Hospital Management Institute, Fudan University has had increasing credibility with the people and hospitals in China. It helps patients choose a hospital most suited for them to meet with their medical demands, and helps set a benchmark for the development of hospitals. This paper will detail the Chinese hospital ranking method from the aspects of theoretical framework, practical choice and practical effect.

Method: Social reputation is used to reflect “process” and the ability to develop sustainably is used to reflect “structure”, and in combination, these two dimensions determine the Chinese hospital rankings.

Results: The final results conclude four different hospital ranking lists, including ‘the hospital reputation rankings of each clinical specialty’, ‘the hospital reputation rankings’, ‘the hospital comprehensive rankings’, and ‘the regional hospital comprehensive rankings’, which are published yearly.

Conclusions: With the development of Chinese hospital rankings produced by the Hospital Management Institute, its credibility is constantly growing. What’s more, it brings great social effects. First, for patients, it provides some useful information about hospitals when they contract severe diseases. Second, for hospitals, it helps to set the benchmark, which will help medical specialized development. Third, it is used as reference of unit performance assessment within a hospital. Fourth, for the local governments, it serves as a guide to the disciplinary construction of medicine in the region.

About the ranking list of Best Hospitals Honor Roll and Overview (Fudan) in China

- In 2017, the English version of the ranking list was released in JHMHP at its first time.

On November 11, 2017, the Honor Roll of the Best Comprehensive Hospitals in 2016 has been released by the Hospital Management Institute, Fudan University, China.

The Honor Roll recognizes 100 hospitals for their exceptional comprehensive abilities where reputation of specialties and scientific research ability are among the factors predominantly weighed.

As usual, Peking Union Medical College Hospital, West China Hospital of Sichuan University and General Hospital of the People's Liberation Army easily made the list, respectively ranking the top 3. Moreover, there are several hospitals rising greatly in the list, such as Shanghai Chest Hospital moving up eleven places to 79th and the First Affiliated Hospital of Nanchang University rising ten places to 90th. For an overall list of the Best

Best Comprehensive Hospitals in 2016.

In the meantime, the Honor Roll of Best Hospitals of Specialties in 2016 has been unveiled as well. Notably, altogether top 10 hospitals are selected in each of these 37 specialties. The specialties range from Pathology, Radiology, Pulmonology, Stomatology, Urology and Psychiatry and others with a rather comprehensive coverage on our daily needs. With no doubt, Peking Union Medical College Hospital, West China Hospital of Sichuan University and General Hospital of the People's Liberation Army, the top 3 comprehensive hospitals, are leading the most entries of the specialties among the list. Some of the entries of hospitals have been heatedly discussed. The top 10 hospitals in each of specialties are listed below, please find details in *Tables 2-38: Honor Roll of Best Hospitals of*
